

# RISK

## ASSESSMENT

This Risk Assessment training course is designed to assist with compliance with the Management of Health and Safety Regulations 1999. With step-by-step guidance on how to complete a robust workplace risk assessment.

The course helps you to understand the process involved in building a risk assessment, you will learn how to identify risks, manage hazards and determine the likelihood of harm. The course will also explain the importance of implementing your findings.

### COURSE COVERS

Identifying risks

The likelihood of harm and who is at risk of harm.

What your risk assessment must include and what records need to be kept.

### SUITABLE FOR

This course is suitable for business owners, supervisors and managers who are responsible for the health and safety of a team (known as the Responsible Person).

This course is aimed at all industries from manufacturing to the office environment.
